

AutoEffortless — Product Portfolio

Click-and-Buy Applications · Build once · Sell forever · Zero setup

Version 1.0 · 26 August 2026 · autoeffortless.com

The Model

- **Pure web applications** — hosted by us, used in the browser. No apps to install.
- **Click and buy** — Stripe checkout → account auto-created → login → self-serve setup wizard.
- **Zero work from our side per sale** — the customer does their own setup inside the app.
- **No WhatsApp / Meta / verification-heavy integrations** — deliberately excluded.
- **Two price shapes** — monthly subscription (Stripe auto-renew) or one-time lifetime access.

ROADMAP

Phase	Deliverables
Phase 1 — Engine + AI Apps	Click-and-buy storefront (checkout → auto-account → wizard) + DocChat + Contract Generator + Invoice App .
Phase 2 — Business Apps	CRM, Stock, HR, Booking, Content Studio, Form Builder.
Phase 3 — Vertical Apps	School, Church, Property, Salon, Sports Club.

STRATEGIC NOTES

- One login, one suite — apps bundle into tiered subscriptions (R199 / R499 / R999 per month), each app also sellable standalone.
- Everything reuses existing AutoEffortless infrastructure (portal, AI agents, PDF engine, Stripe) — new sales cost us nothing per unit.
- Revenue target: R200k/month by Month 6, combining these products with the managed service line.
- Deliberately excluded: WhatsApp/Meta integrations, managed setups, custom builds — those stay in the managed offering.
